**RESUMEN DEL PROGRAMA DE MANEJO DEL
AREA DE PROTECCION DE FLORA Y FAUNA METZABOK**

INTRODUCCION.

El 23 de septiembre de 1998 se publicó en el Diario Oficial de la Federación el Decreto por el que se declara área natural protegida, con el carácter de área de protección de flora y fauna, la región conocida como Metzabok, ubicada en el Estado de Chiapas, con una superficie territorial de 3,368-35-87.5 hectáreas, decreto que se publicó por segunda ocasión el 31 de mayo de 1999.

El Area de Protección de Flora y Fauna Metzabok se localiza en la zona norte de la Selva Lacandona y es uno de los espacios de selva tropical de mayor extensión por lo que constituye una de las regiones prioritarias para la conservación en México.

OBJETIVOS GENERALES Y ESPECIFICOS DEL PROGRAMA

Objetivo general.

Constituir el instrumento rector de planeación y regulación que establece las actividades, acciones y lineamientos básicos para el manejo y la administración del área natural protegida respectiva.

Objetivos específicos.

Protección.- Definir los criterios de manejo del Area con el objeto de mejorar el ambiente y controlar su deterioro, mediante el aseguramiento de la permanencia y el equilibrio de los procesos naturales que en ella ocurren.

Para cumplir con este objetivo deberán realizarse acciones preventivas y correctivas por medio de la inspección y vigilancia permanentes, así como el manejo de contingencias, la protección contra especies invasoras y el control de especies nocivas.

Manejo.- Desarrollar sistemas de cultivo y formas de manejo de recursos naturales, que apliquen tecnologías alternativas para conservar la biodiversidad y el patrimonio cultural del Area de Protección de Flora y Fauna Metzabok y que mejoren las condiciones de vida de los pobladores locales.

Este objetivo abarca las actividades extractivas, productivas alternativas y tradicionales; el desarrollo comunitario y los asentamientos humanos; el manejo y uso sustentable de agroecosistemas y ganadería, de ecosistemas terrestres, recursos forestales, vida silvestre y recursos acuáticos; mantenimiento de servicios ambientales; uso público y recreación al aire libre.

Restauración.- Establecer las actividades y acciones de rehabilitación, recuperación y restauración que permitan garantizar la permanencia y restablecimiento de las condiciones y características ambientales de los ecosistemas, las poblaciones y las comunidades naturales que han sido degradadas o que presenten graves desequilibrios ecológicos.

Este objetivo abarca la conectividad e integridad del paisaje; la recuperación de especies prioritarias; la conservación de agua y suelos; la reforestación y restauración de ecosistemas y la rehabilitación de corredores de vegetación riparia y sistemas fluviales.

Conocimiento.- Establecer líneas de investigación y monitoreo con base en las necesidades del Area que permitan contar con información para la planeación, aplicación y evaluación de las actividades de manejo y desarrollo sustentable.

Este objetivo abarca el fomento a la investigación y la generación de conocimiento; la formulación de inventarios y líneas base, el monitoreo ambiental y la utilización de sistemas de información.

Cultura.- Aportar conocimientos sobre la conservación de los ecosistemas y recursos naturales, así como acerca de su valoración por parte de los pobladores y usuarios, a través de un programa de educación ambiental.

Este objetivo abarca actividades y acciones referentes a educación ambiental, capacitación y formación, difusión, divulgación y participación social.

Gestión.- Consolidar una estructura administrativa, operativa organizada y eficiente para garantizar la operación y la instrumentación del Programa de Manejo.

Este objetivo se refiere a la administración y operación del Area; a las acciones para promover la calidad y efectividad institucional; la concertación e integración regional y sectorial; la infraestructura, señalización y obra pública; la procuración de recursos e incentivos.

DELIMITACION, EXTENSION Y UBICACION DE LAS SUBZONAS

La zonificación es el instrumento técnico de planeación que se utiliza en las Areas Naturales Protegidas con el objeto de ordenar su territorio en función del grado de conservación y representatividad de sus ecosistemas, la vocación natural del territorio, así como el uso actual y potencial del mismo, de conformidad con los objetivos dispuestos en la declaratoria de creación del Area. La subzonificación constituye el instrumento técnico y dinámico de planeación establecido en el Programa de Manejo y utilizado con el fin de ordenar detalladamente las subzonas de manejo del Area.

En el Programa de Manejo del Area de Protección de Flora y Fauna, se utilizaron los siguientes:

Criterios de subzonificación

- Los objetos de conservación del Area;

- La naturaleza y características de cada ecosistema;

- La vocación del territorio en función de sus recursos naturales para sostener las actividades productivas;

- La localización de los asentamientos humanos;

- El uso actual y potencial del suelo, y

- El análisis del estado de conservación de los ecosistemas.

Zonas y políticas de manejo

Para el Area de Protección de Flora y Fauna Metzabok las subzonas definidas son: preservación; uso tradicional; aprovechamiento sustentable de recursos naturales; aprovechamiento sustentable de ecosistemas; uso público; asentamientos humanos y recuperación.
